About me

I'm a student at RMIT University, pursuing a master's degree in Information Technology. I have over a year of experience as a software developer with demonstrated proficiency in developing and maintaining software applications. I'm adept at writing efficient and clean code in multiple programming languages and always committed to staying current with new technologies and industry trends to continuously improve my skills and deliver outstanding results. In addition to my technical abilities, I am also a strong team player and an excellent problem solver.

Experience

- **Associate Software Developer** | May 2022 – Nov 2022 | Vah Vah Institute Pvt Ltd
 - Successfully executed the revamp of the company's primary website to feature a modern design, as well as incorporating additional sections to enhance the overall user experience.
 - Integrated additional functionalities into the company's admin website in accordance with specified requirements by utilizing efficient queries and optimized indexing to ensure rapid response times and improved performance.
 - Resolved over 50 technical issues within the administrative website through a thorough understanding of existing code and implementation of necessary modifications from both front-end and back-end perspectives.
 - Developed and implemented three cron services to automate the updation of database values, ensuring efficient operation and fulfillment of requirements.

Technologies Used – Next JS, TypeScript, Node JS, MySQL, MongoDB

- **Software Developer Intern** | June 2021 – Nov 2021 | Exathought Technology Consulting Pvt Ltd
 - Augmented the company's primary website by incorporating additional sections and utilizing third-party libraries such as Konva.js to implement intricate user interface elements.
 - Contributed to the development of a wholesaler-retailer cross-platform mobile app, serving as one of five front-end developers, using the Flutter framework.
 - Collaborated closely with both UI/UX designers and back-end developers to ensure that all functionalities were implemented with a focus on both aesthetic appeal and code maintainability, resulting in optimal performance of the application.

Technologies Used – Next JS, Tailwind CSS, Flutter

Technical Skills

Git

Next JS

React JS

TypeScript

Node JS

Mongo DB

React Native

Python

Flutter

MySQL

Education

Master of Information Technology | Pursuing |
RMIT University *Melbourne, Victoria, Australia*

Bachelor of Engineering | 2018 – 2022 |
DSCCE *Bangalore, Karnataka, India*
(Graduated with 8.73 CGPA)

Projects

- A real-time obstacle detection and pathfinding bot utilizing the A* algorithm.
- An Online chess game using socket programming.
- A real-time chat application with integrated Spotify.

For a detailed understanding of the project and the technologies employed, please visit my portfolio website at <https://lestercorreya.com>

Certifications

- **Microsoft Azure Fundamentals**
Microsoft
- **Full Stack Java and Python Course**
Uttara Info Solutions
- **React JS – frontend web development**
EdYoda Digital University
